

What type of laser hair removal is right for you? Refer to the following information find a suitable system to you.

| Skin Type | Hair Color | Right Machines | Conclusion |
|--|-----------------------|---|--|
| <p>Type I</p>  | Black Brown | <u>Alexandrite Laser</u> <u>Diode Laser</u> <u>Ruby Laser</u> <u>IPL</u> | <p>Alexandrite is the most popularly known of laser hair removal. It is most effective, comfortable, fastest for Skin Types I-II and larger body parts. Alexandrite has a good effectiveness especially thinner, finer hairs which other lasers cannot touch. However, it is not recommended to use in any Skin Types III-VI. It worth noting that, the alexandrite laser frequently produces temporary pigmentary changes.</p> <p>IPL have the same effectiveness as laser but need more sessions. It is not recommended to Skin Types III-VI because IPL is more prone to cause burns for darker skin than lasers.</p> |
| | Red Blonde Grey | <u>Syneron ELOS</u> | |
| <p>Type II</p>  | Black Brown | <u>Alexandrite Laser</u> <u>Diode Laser</u> <u>IPL</u> | <p>Ruby is not as effective as the Alexandrite. However, patients would have experienced less pain than Alexandrite. Unless you are very afraid of pain, otherwise it is not recommended.</p> |
| | Red Blonde Grey | <u>Syneron ELOS</u> | |
| <p>Type III</p>  | Black Brown | <u>Diode Laser</u> | <p>Diode is the most common laser device; it is very effective for hair reduction in Skin Types I-IV.</p> <p>Syneron ELOS can provide long term hair reduction for all hair types and Skin Types I-V. RF of ELOS is color blind so it targets the germinative part of the hair follicle rather than the melanin found in the hair shaft, or hair bulb. Some clinical report that nearly only 60% of light hair was removed after 8-9 treatments. However, patient will experience more pain than other laser treatment.</p> |

| <p>Type IV</p>  | <p>Black Brown</p> | <p><u>Diode Laser</u></p> | <p>Diode is the most common laser device, it is very effective for hair reduction in Skin Types I-IV.</p> |
| | <p>Red Blonde Grey</p> | <p><u>Syneron ELOS</u></p> | <p>Syneron ELOS can provide long term hair reduction for all hair types and Skin Types I-V. However, patient will experience more pain than other laser treatment.</p> |
| <p>Type V</p>  | <p>Black Brown Red Blonde Grey</p> | <p><u>Nd:YAG Laser</u> <u>Syneron ELOS</u></p> | <p>Nd:YAG works well on all types of skin, even on darker skin. So, it is the most commonly used device for Skin Types V-VI. But still ideal results have not been obtained with fine, light or white hair. Patients have reported that it is painful but promises longer hair removal solution.</p> |
| <p>Type VI</p>  | <p>Black Brown Red Blonde Grey</p> | <p><u>Nd:YAG Laser</u></p> | |
